

Our Commitment to Accessibility

We are committed to making our website accessible and user friendly to the wider possible audience, regardless of ability. We contribute time, our expertise and creativity to accelerating accessibility.

Our website is adhering to the World Wide Web Consortium's (W3C) Web Content Accessibility Guidelines. It helps us to ensure that the website is accessible to blind people, people with cognitive disabilities, visual impairment, and more. We have used an accessibility interface which allows visitors with specific disabilities to adjust the website's UI and design as per their preference.

We are considering accessibility as an ongoing effort. We are actively engaged in performing regular website audits, evaluations, and testing to ensure our web properties meet or exceed accessibility standards.

Feedback or Questions?

Regardless of our best efforts to permit anybody to adjust the website to their needs, there may still be pages or sections which are not completely accessible, are in the process of becoming accessible, or are lacking a competent technological solution to make them accessible. We are still improving our accessibility widget, adding features and updating its options, and developing new technologies. If you want to get in touch with the website's owner, please use the website form!
